

**PRODUCT OBSOLESCENCE NOTIFICATION:
SECURITY AND DOOR CHIMES**

INTRODUCTION

Friedland will be making the SA security range and specific door chimes obsolete from the 31st March 2011.

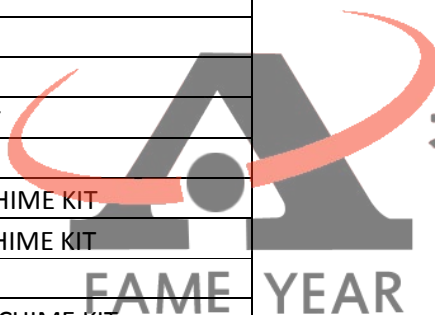

JUSTIFICATION

Over the past 2 years, Friedland has been working on a new range of security products that work on the 868MHz frequency. As a consequence of this it has decided to make the SA 433MHZ range of security obsolete as of the 31st March 2011

Friedland has also been working on a rationalization of the chimes range and filter out products that have been low runners over previous years which will provide a more clear and concise range.

PRODUCT LIST
